Dear friends,
First of all I would like to thank you all for coming to Valencia and attend the VI UENPS meeting! We are most grateful and feel very happy about it.

Looking at the program you will immediately perceive the great quality of the speakers and the relevance of the presentations most of which deal with cutting edge issues of newborn care that undoubtedly influence our daily work as neonatologist. There will be 4 main sessions dealing with: “The ILCOR process 2015: A critical review”; “Maternal immunization in pregnancy”; “Sciences centered at the family centered care” and “Evidence based medicine and clinical trials”. In addition, we will have 16 parallel sessions covering a broad spectrum of neonatal issues some of which are classical such as Follow Up, Delivery room management, Chronic respiratory problems, Mechanical Ventilation, Nutrition, Oxygen, Fungal infections, Hemodynamics, etc., but other such as Ethics, Microbiome, Objectivity in the delivery room, Stillbirth, Fungal infections reflect increasingly worrying aspects of our daily clinical performance or add relevant improvement to our clinical undertaking such as Lung ultrasound at the bed side, availability of human milk for all our preemies by human milk banking, novel biomarkers for early diagnosis and prediction of outcomes, point of care hemodynamics, access to information through Neonatal Networks, improvement of outcomes applying Neurointensive Care in our units etc. In addition, there will be monographic industry-sponsored Pre-congress courses that will allow going into depth in very specific clinical matters in close interaction with experts. Finally, the most relevant aspect in every congress is the direct participation of the attendants in the form of poster and oral abstract presentations. We have received hundreds of communications of a great scientific and clinical level dealing with every aspect of Neonatology. We would like to especially thank our colleagues who have devoted part of their spare time to write and send their clinical and scientific work thus giving us the possibility to openly discuss their contributions.

Valencia in November has a very special light. Autumn is by far not a gloomy and melancholic period of the year in our city. Its very special light and luminosity confers our city a cheerful and optimistic atmosphere. The reflections of the sun in the surface of the sea are of an indescribable beauty. Sharing a good seafood lunch with friends and colleagues at the seaside becomes an unforgettable experience. We are sure that with your attitude you also will confer our congress such a bright, enthusiastic and colorful environment. You are the most relevant part of it.

Thanks again for coming and enjoy the VI UENPS congress.

Maximo Vento MD PhD
President VI UENPS Congress
Valencia.
UENPS
Union of European Neonatal & Perinatal Societies

HISTORY
UENPS was founded during the first of July 2006, in Vienna, as a confederation of European Societies i.e. an organization integrating national European Neonatal or Perinatal Societies under one organizational roof.

During the 1st two years, the Societies implemented the following actions:
- Asking societies to joint UENPS
- 1st UENPS congress in Roma
- Some multicenter trials were proposed by some researchers and carried out.
- UENPS official registration in Roma 17th April 2008

COLLABORATION
UENPS collaborates in the fields of education, research, guidelines to improve quality in perinatal assistance (better practices) with all European and International Societies of Neonatology and Perinatology. EuroNeoNet, EFCNI (European Foundation for Care of the Newborn Infant) and ESN (European Society of Neonatology) are recent Partner Societies or Scientific Associate Members of UENPS.

VISION
UENPS Vision is:
- to promote the knowledge of the perinatal indicators and
- to develop recommendations, guidelines, training of the healthcare providers and any other tool to achieve the best healthcare for every newborn and surveillance of neonatal rights wherever they are born.

MISSION
The mission of UENPS is to improve healthcare in the neonatal and perinatal medicine in the European countries.
Main goals of UENPS are to improve quality in perinatal and neonatal care by integrating, coordinating and adding national and scientific societies’ efforts

For further information please contact us!

10:00 - 11:30  ROOM: AUDITORIO 3A
PARALLEL SESSION 3
MICROBIOME AND NUTRITION IN NEONATOLOGY

CHAIRPERSON - Maria Carmen Collado (Valencia, Spain); Heili Varendi (Tartu, Estonia)

10:00 - 10:30  Factors affecting the early life microbiome and clinical implications
Josef Neu (Gainesville, USA)

10:30 - 11:00  Probiotics and preterm infants: clinical aspects and controversies
Janet Berrington (Newcastle, UK)

11:00 - 11:30  Perinatal microbial contact - a target for probiotic intervention to reduce the risk of non-communicable disease
Samuli Rautava (Turku, Finland)

10:00 - 11:30  ROOM: AUDITORIO 3B
PARALLEL SESSION 4
SEEKING OBJECTIVITY IN THE DELIVERY ROOM

CHAIRPERSON - Arjan te Pas (Leiden, The Netherlands); Jonathan Wyllie (South Tees, UK)

INTRODUCTION: Why is it needed?
Arjan te Pas (Leiden, The Netherlands)

10:00 - 10:30  Seeking objectivity by video
Colm O’Donnell (Dublin, Ireland)

10:30 - 11:00  Seeking objectivity by scoring
Mario Rüdiger (Dresden, Germany)

11:00 - 11:30  Seeking objectivity by numbers
Jeroen van Vonderen (Leiden, The Netherlands)

11:30 - 13:10  ROOM: AUDITORIO 1
ORAL COMMUNICATION 1
Perinatal Hypoxia + Ventilator approach and effects

CHAIRPERSON - Rasa Tameliene (Kaunas, Lithuania)

11:30 - 11:37  A Middle-study safety Control in a Hypothermia Plus Melatonin Clinical Trial (022)
Antonio Jerez Calero

11:37 - 11:44  Regional Somatic Oximetry in Neonates of Different Gestational Age in NICU (127)
Maria Degtyareva

11:44 - 11:51  Prognostic Value of Apparent Diffusion Coefficient Values In Newborns with Hypoxic-Ischemic Encephalopathy Treated with Therapeutic Hypothermia (136)
Isabel Benavente-Fernández

11:51 - 11:58  Prognostic Value of Diffusion-Weighted Imaging In Newborns with Hypoxic-Ischemic Encephalopathy Treated with Therapeutic Hypothermia (137)
Isabel Benavente-Fernández
11:58 - 12:05 Fetal-To-Neonatal Transition Under Hypoxic Atmosphere in Brain (142)
  *Isabel Torres Cuevas*

12:05 - 12:12 Novel Biomarkers for Perinatal Asphyxia: Alterations of the CDP-choline Pathway (187)
  *Ángel Sánchez-Illana*

12:12 - 12:19 Neuroprotection with Hypothermia and Allopurinol. Is it a Gender Question? (244)
  *Marta Camprubi*

12:19 - 12:26 Therapeutic Hypothermia in Asphyxiated Neonates: Experience from Neonatal Intensive Care Unit of University Hospital of Marrakech (272)
  *Nadia Idrissi Slitine*

12:26 - 12:33 Hypoxic-Ischemic Encephalopathy Therapy Optimization in Neonates for Better Neuroprotection With Inhalative CO2 (HENRIC) (293)
  *Eniko Szakmar*

12:33 - 12:40 Effect of High Insuflation Pressure on the Histopathological and Radiological Findings in the Experimental Animals Lungs Durring Mechanical Ventilation (024)
  *Valentina Videnovic*

12:40 - 12:47 Respiratory Management and Bronchopulmonary Dysplasia (054)
  *Cristina Ramos-Navarro*

12:47 - 12:54 Ventilator-Associated Pneumonia in a Neonatal Intensive Care Unit: a Potentially Serious Complication Associated with Mechanical Ventilation (226)
  *Rocío del Carmen Negrillo Ruano*

12:54 - 13:01 Use of High Flow Nasal Canulae in Moderate and Late Preterm, Experience in one Single Center (236)
  *Miquel Ramon*

11:30 - 13:10 ROOM: AUDITORIO 2

**ORAL COMMUNICATION 2**

Neurodevelopment and disability, Brain monitoring, “OMICS” in neonatology, NICU clinical care and practices / Quality improvement in neonatal care

**CHAIRPERSON - Boris Filipovic-Grcic (Zagreb, Croatia); Nuria Boronat (Valencia, Spain)**

11:30 - 11:37 Development of premature born children - what about language, reading and writing? Speech and language pathologist’s view (072)
  *Mirjana Lencek*

11:37 - 11:44 Perinatal Stroke: A Leading Cause of Seizures in the Neonatal Period. 4 Year Experience in a Tertiary Neonatal Intensive Care Unit (105)
  *Paraskevi Mikrou*

11:44 - 11:51 Assessment of Sleep in Infants During The First Six Months of Life (123)
  *Elvira Larqué*

11:51 - 11:58 Normal MRI in children from the Portuguese Cerebral Palsy Registry (168)
  *Daniel Virella*
11:58 - 12:05 Decreased cerebral glucose metabolism using F-18 FDG brain PET/CT in very low birth weight infants without structural abnormality on brain MRI (175)
Jaehyun Park

12:05 - 12:12 The effect of phototherapy on the electrocortical brain activity in term newborns measured by amplitude-integrated EEG- pilot study (288)
Zuzana Zimová

12:12 - 12:19 Outcome prediction in preterm infants with intraventricular haemorrhage using a newly developed MRI based scoring system (218)
Katharina Goeral

12:19 - 12:26 Supratentorial brain growth through tridimensional ultrasound in the very low birth weight preterm infant. (194)
Isabel Benavente-Fernández

12:26 - 12:33 Normal cerebellar growth through tridimensional ultrasound in the very low birth weight preterm infant from birth to term corrected age. (195)
Isabel Benavente-Fernández

12:33 - 12:40 Newborn metabolomic profile mirrors that of mother in pregnancy (122)
Simona Negro

12:40 - 12:47 Long term differences in metabolic pattern between milk from mothers delivering term and preterm newborns: a metabolome study (224)
Serafina Perrone

12:47 - 12:54 Metabolomics analysis on the BALF of preterm infants with a gestational age less than 30 weeks to identify new biomarkers of BPD (225)
Fiammetta Piersigilli

12:54 - 13:01 Reducing Medication Errors on the Neonatal Unit- A multimodality Approach (166)
Hafis Ibrahim Chokkiyil Ponnambath

Sylvia Caballero

11:30 - 11:37 Early Treatment of Hyperbilirubinaemia with Intravenous Immunoglobulins in ABO or Rh Isosensibilisation of the Term Newborns (101)
Danaja Zolger & Joze Zolger

Víctor Galán Gómez
11:44 - 11:51  Diabetic Pregnancy Activates Innate Immune Response Through TLR5 or TLR1/2 on Cord Blood-Derived Monocytes (048)
   Daisuke Tokuhara

11:51 - 11:58  Interleukin 17A in Bronchoalveolar Lavage: an Early Marker of Ventilator-Associated Pneumonia in Preterm Infants (149)
   Maria Cernada

11:58 - 12:05  Very Low Weight Preterm Twins diagnosed with late-onset sepsis show Changes in Gut Microbiota Profiles and Mucosal Cells Gene Expression (150)
   Maria Cernada

12:05 - 12:12  Micro-method for Determination of Linezolid in Therapeutic Drug Monitoring in Neonates (242)
   Bianca Maria Goffredo

12:12 - 12:19  Reduced TNFα Response in Preterm Neonates is Associated with Impaired Non-Classical Monocyte Function (248)
   Lukas Wisgrill

12:19 - 12:26  Spectrum of Congenital Viral Infections in Neonates (307)
   Ramya Chandra Ramaswamy

12:26 - 12:33  Early detection of neonatal infection at birth in premature infants by clinical and laboratory markers (114)
   Anna Masseva

12:33 - 12:40  Serum levels of Mannose Binding Lectin (MBL) and S100 protein B as biomarkers of neurological damage in asphyxiated newborn: possible effects of therapeutic hypothermia. Preliminary data from a prospective study (266)
   Cinzia Auriti

12:40 - 12:47  TLR2/TLR6 heterodimer-mediated innate immune response in cord blood immune cells (049)
   Yuki Cho

12:47 - 12:54  First experiences in therapeutic hypothermia treatment of HIE in period of January 2011 - December 2011 in NICU at University Clinical Center Sarajevo (274)
   Amra Cengic

11:30 - 13:10  ROOM: AUDITORIO 3B
   ORAL COMMUNICATION 4
   Epidemiology, perinatology and infancy, Fetal origin of adult disease, Genetic diseases: relevant to brain malformations, Miscellaneous

   CHAIRPERSON - Marta Aguar (Valencia, Spain); Po Yin Cheung (Alberta, Canada)

11:30 - 11:37  Newborn genetic screening for hearing impairment: A population-based longitudinal study (008)
   Hsin-Chung Huang

11:37 - 11:44  The Relation between Outdoor Air Pollution and Sudden Infant Death Syndrome – A Population-Based Case-Control Study (028)
   Yu-Shan Chang
Newborn genetic screening for congenital central hypoventilation syndrome in 41,152 newborns (096)
  Ping-Chun Kuo

Changes in Nutritional Status of VLBW Infants from Birth to Discharge and 40 Weeks Corrected Age (CA) in the Neocosur’s Network (NN) (172)
  Ivonne D’Apremont

Study of bacterial contamination of mobile phones and stethoscopes in neonatology. (269)
  Nadia El Idrissi Slitine

Birth at 36 and 37 Weeks Gestation - almost Similar Perinatal Risks Versus Term Delivery - Case-Control Study (337)
  Maria Livía Ognean

Cardiovascular risk: scheduled or not? (085)
  Bibiana Riaño Méndez

Factors Influencing Breastfeeding of Premature Newborns (116)
  Natalija Skorobogatova

Non-Targeted and Targeted Urine Metabolomic Analysis in Neonates with Late-Onset Sepsis (183)
  Kosmas Sarafidis

Outcomes in Very Preterm Neonates With Severe Hypoxemic Respiratory Failure (HRF) Rescued with High Frequency Oscillatory Ventilation (HFOV) and Inhaled Nitric Oxide (INO) (303)
  Po Yin Cheung

Human Milk Bank Establishment in a Neonatal Unit Improves Breastfeeding Rates (223)
  María Gormaz Moreno

An infant with Hunter Syndrome aggravated by a communicating hydrocephalus (199)
  Nina Mól

ROOM: AUDITORIO 2

SCIENTIFIC SESSION
PRESENT AND FUTURE IN NONINVASIVE OXYGEN MONITORING AND NEONATAL SCREENING
Industry Supported Session – please see page 28 - Lunch will be provided

CHAIRPERSON - Maximo Vento (Valencia, Spain)

Congenital Cardiac Malformation Screening
  Andrew Ewer (Birmingham, UK)

Episodes of Decreased Oxygen Saturation in Newborns in Skin-to-Skin Contact: Role of Maternal Position after Delivery. A Randomized Clinical Trial
  Carmen R. Pallas (Madrid, Spain); Catalina Morales (Madrid, Spain)
Targeting Saturation in the Preterm Babies in the First Minutes of Life
Maximo Vento (Valencia, Spain)

Noninvasive Oxygen Monitoring: New Frontiers
Augusto Sola (Miami, USA)

14:40 - 16:10
ROOM: AUDITORIO 1
POSTER PRESENTATION 1
Pain management, Perinatal Hypoxia, Outcomes of prematurity, Neonatology - general, Neurodevelopment and disability, Novel insight into ROP: novel therapy and mechanism, Miscellaneous

CHAIRPERSON - Rosalina Barroso (Amadora, Portugal); Maria Gormaz (Valencia, Spain)

14:40 - 14:45
Assessment of different methods in procedural pain relief in newborns (205)
Almerinda Barroso Pereira

14:45 - 14:50
Oral Glucose and Listening to Lullaby to Decrease Pain in Preterm Infants Supported with NCPAP: A Randomized Controlled Trial (290)
Kadir Serafettin Tekgündüz

14:50 - 14:55
Characteristics and Discharge Outcomes of Infants Undergoing Therapeutic Hypothermia in American NICUs (097)
Kevin R. Ellsworth

14:55 - 15:00
Perinatal Management and Mortality Rates at the Limit of Viability (158)
Susana Zeballos Sarrato

15:00 - 15:05
Parent Care Tags: Engaging Parents in Care on the Neonatal Unit (011)
Rachel Homer

15:05 - 15:10
Stress biomarkers and psychosocial factors as prematurity predictors in threatened preterm labor (043)
Maximo Vento

15:10 - 15:15
Quality of Life in Premature Babies from Mother’s Perspective (129)
Anca Roxana Bivoleanu

15:15 - 15:20
Brief Resolved Unexplained Events (BRUE) during the first year of life in ex-preterm infants discharged home with and without caffeine (281)
Veronica Mugarab-Samedi

15:20 - 15:25
Neonatal Marfan syndrome (287)
Tomas Jurko

15:25 - 15:30
Prenatal Surgery of myelomeningocele: is it worth doing? (053)
Hernan Villalon

15:30 - 15:35
Tendency of Retinopathy of Prematurity. Are our preterm babies safe from it? (060)
Maria del Pilar Priego

15:35 - 15:40
Bilateral clavicle fracture: A rare cause of persistent crying (033)
Pedro Miguel da Costa e Cruz

FRIDAY 25/11/2016

08:30 - 10:00  ROOM: AUDITORIO 1
MAIN SESSION 3
SCIENCES AT THE CENTER OF FAMILY CENTERED CARE

CHAIRPERSON - Liisa Lehtonen (Turku, Finland); Jeff Alberts (Bloomington, USA)

08:30 - 08:40  Introduction
Liisa Lehtonen (Turku, Finland)

08:40 - 09:10  The Onsets of Bonding - Lessons from Animal Research
Jeff Alberts (Bloomington, USA)

09:10 - 09:40  Promoting Parent-Infant Closeness in Neonatal Units
Liisa Lehtonen (Turku, Finland)

09:40 - 10:00  QUESTIONS

10:00 - 11:30  ROOM: AUDITORIO 1
PARALLEL SESSION 9
CHRONIC RESPIRATORY PROBLEMS IN THE NEONATE

CHAIRPERSON - Manuel Sánchez Luna (Madrid, Spain); Santiago Pérez Tarazona (Valencia, Spain)

10:00 - 10:30  Bronchopulmonary dysplasia: an ongoing threat. The role of inflammation and possible strategies of prevention and treatment
Christian Speer (Würzburg, Germany)

10:30 - 11:00  Can HFOV prevent BPD?
Manuel Sánchez Luna (Madrid, Spain)

11:00 - 11:30  Follow up on long term control of CLD
Eugenio Baraldi (Padova, Italy)

10:00 - 11:30  ROOM: AUDITORIO 2
PARALLEL SESSION 10
MECHANICAL VENTILATION

CHAIRPERSON - Gianluca Lista (Milan, Italy); Corrado Moretti (Rome, Italy)

10:00 - 10:30  HFOV
Anton van Kaam (Amsterdam, The Netherlands)

10:30 - 11:00  Updated conventional mechanical ventilation
Sunil Sinha (Middlesbrough, UK)

11:00 - 11:30  NAVA ventilation
Jan Mazela (Poznan, Poland)
### PARALLEL SESSION 11
**HUMAN MILK IN THE NEONATAL INTENSIVE CARE UNIT**

<td>Effects of automated closed loop control of inspired oxygen concentration on fluctuations of arterial and different regional organ tissue oxygen saturations in preterm infants (157)</td>
<td>Marek Gajdos</td>
</tr>
</tbody>
</table>
11:58 - 12:05 The incidence of respiratory morbidity in late preterm infant (178)
Gabriela Olariu

12:05 - 12:12 Prediction of mortality in neonates with Congenital Diaphragmatic Hernia (258)
Jordi Clotet Caba

12:12 - 12:19 Congenital chylothorax treated with povidone iodine: report of two cases (270)
Nadia Idrissi Slitine

12:19 - 12:26 Secondary Respiratory Support of Preterm Infants: Non-Invasive Ventilation Versus Continuous Positive Airway Pressure (089)
Anna Menshykova

12:26 - 12:33 Comparing therapeutic impact of Bubble CPAP with Variable CPAP in premature infant with respiratory distress (171)
E. Abbasi Shavazi

12:33 - 12:40 The value of ultrasound examination in predicting chronic lung disease in VLBW infants undergoing respiratory support: preliminary results (208)
Salvatore Aversa

12:40 - 12:47 Dysregulation of Soluble Fms-like Tyrosine Kinase 1 (sFlt-1) Contributes to Pulmonary Hypertension (077)
Chi-Nien Chen

12:47 - 12:54 Epithelial Notch signaling regulates lung alveolar morphogenesis and airway epithelial integrity (140)
Po-Nien Tsao

12:54 - 13:01 Early Management of Neonatal Respiratory Distress Syndrome - A Survey among UK Neonatal Intensive Care Units (059)
Gillian Hendriks

11:30 - 12:05 ROOM: AUDITORIO 2
ORAL COMMUNICATION 6
Enteral nutrition, Neonatal-fetal nutrition and metabolism, Neonatology - general, Miscellaneous

CHAIRPERSON - Miguel Saénz de Pipaón (Madrid, Spain); Nelly Jekova (Sofia, Bulgaria)

11:30 - 11:37 Donor Human Milk Offers Protection Against Lipid Oxidative Stress in Preterm Infants < 32 Gestational Age (155)
Julia Kuligowski

11:37 - 11:44 DNA and Protein Oxidative Stress In Preterm Infants Less Than 32 Weeks of Gestational Age Fed with Donor’s Human Milk Versus Own Mother’s Milk (159)
Anna Parra Llorca

11:44 - 11:51 Relationship between enteral nutrition growth in the early neonatal period and physical and psychomotor development of very premature infants (VPI) in the first 8 corrected months (167)
Vasilisa Talvirskaya
11:51 - 11:58  Human milk banking in Greece; Experience from a public perinatal centre: data from the last decade (305)
  *G. Liosis*

11:58 - 12:05  The very early differences in the body composition between preterm newborns fed with formula or breast milk compared to the group of full term newborns (198)
  *Nina Mól*

12:05 - 12:12  Multidisciplinary simulation trainings for better neonatal emergencies (279)
  *Ervin Saik*

12:12 - 12:19  Are Antibiotics a Risk Factor for the Development of Necrotizing Enterocolitis? (012)
  *Ali Raba*

12:19 - 12:26  Vitamin D Situation in Pregnant Woman and Newborn in La Rioja area in Spain (100)
  *Maria Ruiz del Campo*

12:26 - 12:33  Follow-Up Of CDH Patients in a High-Volume Center: Morbidities at 2 Years Of Age (210)
  *Africa Pertierra*

12:33 - 12:40  Innovative computer application of simulation hemodynamics NeoCardioSim™ to enhance understanding and practical skills in cardiovascular neonatology (267)
  *Witold Blaz*

11:30 - 13:05  ROOM: AUDITORIO 3A
  **ORAL COMMUNICATION 7**
  *Neonatology – general*

  **CHAIRPERSON** - *Jan Mazela (Poznan, Poland); Carmen R. Pallás (Madrid, Spain)*

11:30 - 11:37  Early detection of hyperbilirubinemia in term newborns obtained from umbilical cord blood, treated at the Hospital Teodoro Maldonado Carbo Guayaquil (009)
  *Xavier Andres Poveda Icaza*

11:37 - 11:44  Maternal factors associated with early postnatal weight loss in exclusive breast-fed neonates (029)
  *Lee Chia-Jung*

11:44 - 11:51  NT-proBNP levels at 48-96 hours of life can predict the need for treatment of a hemodynamically Significant Patent Ductus Arteriosus in Very Low-Birth-Weight Infants (038)
  *Silvia Rodriguez Blanco*

11:51 - 11:58  Microbiota of term infants delivered vaginally vs. cesarean section – influence of home environment (088)
  *Jan Mazela*

11:58 - 12:05  Improving the quality of prolonged jaundice work ups in the outpatient department in a tertiary neonatal centre (090)
  *Carmel Maria Moore*
12:05 - 12:12  Correlation of fractional shortening, ejection fraction and blood pressure in premature infants (177)
Na Mi Lee

12:12 - 12:19  Pneumocystis jirovecii colonization in preterm infants (184)
Elisa García García

12:19 - 12:26  Outcome of Neonates with Critical Congenital Heart Disease Hospitalised in an Intensive Care Unit of a Tertiary Hospital (228)
Fani Anatolitou

12:26 - 12:33  Socioeconomic Factors Associated with Congenital Heart Disease in Neonates (231)
Fani Anatolitou

12:33 - 12:40  Antibiotic use in the first week of life (245)
Marta Ferreira

12:40 - 12:47  Late Cord Clamping in Infants of Diabetic Mothers (254)
Hulya Ozdemir

12:47 - 12:54  Stress biomarkers in healthy pregnant women with previous traumas (257)
Maximo Vento

12:54 - 13:01  Persistent pulmonary hypertension of the newborn: experience of a tertiary care unit in Portugal (260)
Susana Patricia Ferreira Lopes

11:30 - 11:37  The association between NIRS and Doppler ultrasonography in preterm infants (051)
Tugba Gursoy

11:37 - 11:44  Development of a Clinician-Reported Outcome (ClinRO) Measure to Assess Readiness for Discharge from Neonatal Care Among Extremely Preterm Infants (066)
Mark Turner

11:44 - 11:51  Neonatal Death Not Arising from Preterm Birth in a High Complexity Healthcare Unit (217)
Ana Morillo

11:51 - 11:58  Genetic predictors of early neonatal period complications (313)
Irina Bushtireva

11:58 - 12:05  Risk Factors for Cerebral Hemorrhage in Preterm Infants ≤32 weeks Gestational age (336)
Maria Livia Ognean
12:05 - 12:12  Childhood neurodevelopmental outcome in low birth weight infants with postligation cardiac syndrome after ductus arteriosus closure: 5-years follow up (010)  
**Adelina Pellicer Martinez**

12:12 - 12:19  Prediction of week of Childbirth for Women with Threatened Preterm Labor (080)  
**Máximo Vento**

12:19 - 12:26  Delivery Room Cardiopulmonary Resuscitation (CPR) at the Limit of Viability (113)  
**Susana Zeballos Sarrato**

12:26 - 12:33  Magnesium sulphate, Antenatal Steroids; Cord clamping; Thermoregulation (MAS-CoT) (174)  
**Althaf Ansary**

12:33 - 12:40  Follow-up at age 8 years of a post-discharge nutrition RCT in preterm infants (186)  
**Charlotte A. Ruys**

12:40 - 12:47  Mother’s own milk vs natural milk from human milk bank in infant’s feeding - evaluation of clinical effects in treatment (285)  
**Maria Wilinska**

13:10 - 14:00  **LUNCH BREAK**

14:00 - 15:30  **ROOM: AUDITORIO 1**  
**POSTER PRESENTATION 2**  
Respiratory disease and support, Outcomes of prematurity, Fetal origin of adult disease, Enteral nutrition, Epidemiology, perinatology and infancy, Neonatology - general  
**CHAIRPERSON - Boris Filipovic-Grcic (Zagreb, Croatia)**

14:00 - 14:05  Interleukin-8 And Its Receptors in Human Milk from Mothers of Full-Term and Premature Infants (030)  
**Adem Polat**

14:05 - 14:10  Breastfeeding Promotion as Health Right for Every Baby from Calabria (156)  
**Giacomino Brancati**

14:10 - 14:15  Risk factors regarding successful exclusive breastfeeding (130)  
**María Miñambres Rodríguez**

14:15 - 14:20  Cardiovascular risk: scheduled or not? (085)  
**Bibiana Riaño Méndez**

14:20 - 14:25  Breast milk expression at the NICU: Experiences of mothers expressing at their preterm infant’s bedside or in a breast milk expression room (071)  
**Marjolaine Héon**

14:25 - 14:30  Postnatal Outcome of Fetal Tachyarrhythmias: 7-year Tertiary Neonatal Intensive Care Unit Experience (102)  
**Paraskevi Mikrou**

Company Profile:
A finger on the Pulse – Clinical Experience, Technical Competence
Sense of responsibility as well as competence in medical and technological innovation are fundamental requirements for the success of the Fritz Stephan GmbH, located in Germany. For decades, the family-owned enterprise has focused consciously on the special fields of ventilation therapy, anaesthesia and oxygen-supply-systems. Hence, Fritz Stephan GmbH has been developing innovative solutions for neonatology and paediatrics. Collaboration with international representatives, clinicians and healthcare providers is an essential factor for future developments of innovative medical technology, orienting entirely towards the needs of patients and healthcare operators.
8th International Congress of UENPS

President Maria Livia Ognean

Union of European Neonatal & Perinatal Societies

President of UENPS Manuel Sánchez Luna

www.uenpscongress.eu
You are Cordially Invited to the Scientific Session at UENPS 2016 in Valencia

Present and Future in Noninvasive Oxygen Monitoring and Neonatal Screening

Location: Auditorium 2 at the Valencia Conference Center
Date and Time: Thursday November 24th • 13:10pm - 14:40pm
Lunch will be provided
Chairperson: Prof. Maximo Vento

Presenters

Congenital Cardiac Malformation Screening
Andrew Ewer, MD, MRCP, FRCPCH
Professor of Neonatal Medicine
Institute of Metabolism and Systems Research, University of Birmingham
Honorary Consultant Neonatologist, Birmingham Women’s Hospital
Birmingham, UK

Episodes of Decreased Oxygen Saturation in Newborns in Skin-to-skin Contact: Role of Maternal Position after Delivery. A Randomized Clinical Trial
Carmen R. Pallás, MD, PhD
Professor of Pediatrics
Medical School of the Complutense University of Madrid
Chief of Neonatology, 12 de Octubre Hospital
Madrid, Spain

Catalina Morales, MD
Neonatologist
12 de Octubre Hospital
Instituto de investigación Biomédica i+12
Madrid, Spain

Targeting Saturation in the Preterm Babies in the First Minutes of Life
Maximo Vento, MD, PhD
Professor of Pediatrics
Chief of Division of Neonatology
University & Polytechnic Hospital La Fe
President of the Spanish Neonatal Society (SENeo)
Valencia, Spain

Noninvasive Oxygen Monitoring: New Frontiers
Augusto Sola, MD
President of Ibero-American Society of Neonatology (SIBEN)
USA

Interactive Session, please ask any questions to our Faculty now!
